**Texts:**

- Carroll & Ostlie, *An Introduction to Modern Astrophysics*, 2nd Ed., Pearson/Addison-Wesley 2007, ISBN 0-8053-0402-9

**Requirements:**

- Weekly problem sets.
- Weekly tutorials with the instructor.
- Attendance at Phys 108 lectures.
- You may sit for the Phys 108 exams if you think they will help your final grade.

**Learning goals:** Upon completion of this course, each student should:

- Understand the nature and evolution of stars;
- Understand the nature and evolution of galaxies;
- Understand the nature and evolution of the universe as a whole;
- Have gained skill in problem-solving;
- Have gained an appreciation for the applicability of physics to scales of space and time far vaster than those encompassed by an individual human being.

**Registrar's Mandatory Privacy Statement:**

- Moodle contains student information that is protected by the Family Educational Right to Privacy Act (FERPA). Disclosure to unauthorized parties violates federal privacy laws. Courses using Moodle will make student information visible to other students in this class. Please remember that this information is protected by these federal privacy laws and must not be shared with anyone outside the class. Questions can be referred to the Registrar's Office.

**Federal Credit Hour Compliance Statement:**

- The student work in this course is in full compliance with the federal definition of a four credit hour course.

Your grade will be based primarily on your scores on the weekly problem sets, but attendance and performance on the Phys 108 exams (if applicable) will be taken into consideration as warranted.
